

# Virtual Workshop:

**Nationwide programmatic environmental impact statement on the expanded production of plutonium “pit” bomb cores**

## **Making Effective Comments at the Upcoming Public Hearings...**

**Why:** Speak your mind at an upcoming hearing on the government’s plan to produce up to 120 new plutonium pits per year for nuclear weapons for the next 50 years!

**When:** Thursday, May 22 at 3- 4:30 PM PST / 6-7:30 EST

**Zoom Link:** <https://tinyurl.com/3tta9vey>

**Background:** Pursuant to the National Environmental Policy Act, Nuclear Watch New Mexico, Savannah River Site Watch and Tri-Valley CAREs successfully sued the National Nuclear Security Administration (NNSA) over its failure to complete a required nationwide “programmatic environmental impact statement” (PEIS) for its most costly program ever, the expanded production of plutonium “pit” bomb cores. No future production is to maintain the safety and reliability of the existing nuclear weapons stockpile. Instead, all pit production will be for new design nuclear weapons.

To meet its enforced legal obligation, the NNSA is holding two virtual “scoping” hearings:

**Tuesday, May 27, 2025: 5:00-7:30 pm EST &**

**Wednesday, May 28, 2025: 7:00 pm-9:30 pm EST**

- Talking points and suggested scoping comments
- Explanation of procedural process
- Question & answers with subject matter experts

**Organized By:**

  
nuclear watch new mexico  
*Watchdog of the Nuclear Weapons Complex*

**SRS**  **WATCH**

Savannah River Site Watch

 **Tri-Valley CAREs**

**[ Union of  
Concerned Scientists ]**
